

# DSi Eclipse in the Cloud

## Speed. Security. Simplicity.

You deserve a review platform that makes your job easier; one that allows you to handle **LARGE AMOUNTS OF DATA** while **EASING OPERATIONAL HEADACHES**... that helps you **CUT COSTS** and includes full **TRAINING** and **SUPPORT**... that **SCALES** to fit your needs and features an intuitive, user-friendly interface... and that ensures your data is **SECURE** while **STREAMLINING** your eDiscovery workflow.

You deserve **DSi Eclipse in the Cloud**.

### RICH IN FEATURES

- ▶ Customize your workflow review with smart folders
- ▶ Drag and drop documents
- ▶ Select data quickly thanks to easily viewable document contents
- ▶ Trace documents and connect by like keywords up to eight generations deep
- ▶ Maximize efficiency by dragging, docking or floating project windows
- ▶ Work with TIFF, HTML, Native, OCR and transcript files concurrently
- ▶ Apply custom production options including watermarks, highlights, mark-ups, bates stamps, issue tags, confidentiality statements or custom defined messages

### ENHANCED SEARCH

- ▶ Identify and categorize pertinent documents with the Predictive Coding engine
- ▶ Find exact and near duplicates so time is not lost on repetitive data
- ▶ Easily apply filters, create multiple indexes and combine previous and current queries with Search Wizards
- ▶ Use incorporated proprietary DSI processes including keyword analytics, advanced sampling techniques, near duplicate analysis and predictive ranking

DSi Eclipse in the Cloud provides the power and agility to manage large-scale hosted review efficiently and cost effectively. With unparalleled flexibility, superb case control and detailed visibility into your data, review time is greatly reduced. By harnessing the cloud, your data can be accessed from anywhere in the world through a secure, user-friendly online interface.

Plus, DSI hosts and fully maintains Eclipse for you. There are no large capital expenses or software upgrades to worry about. You can focus on the important tasks without any added frustrations and distractions that come from maintaining your own review environment.

*Key Search features of DSI Eclipse in the Cloud include: search metadata and document content independently, preview search results before executing, manage multiple indexes for the same case, build complex boolean searches with toolkit, and more.*

*Monitor case progress, a review pass, a batch or an individual reviewer through the dashboard. Real-time reporting ensures up-to-date information.*

# DSi Eclipse in the Cloud

## Freedom in the Cloud

EXPERIENCE **THE POWER OF ECLIPSE** WITHOUT THE BURDEN OF INFRASTRUCTURE RESPONSIBILITIES

### ACCESSIBLE ON DEMAND

With DSi Eclipse in the Cloud, you can easily and securely access data from anywhere in the world using a Web browser.

### NO LARGE CAPITAL OUTLAY

DSi alleviates the hassles and high costs that come with enterprise software. There is no need to buy, host or manage new server build-outs, additional data storage capacity, software upgrades, litigation support personnel or any other infrastructure requirements.

### COMPLETE HARDWARE SUPPORT

DSi maintains your Eclipse environment for you, including full data backup, version upgrades, disaster recovery and break-fix responsibilities.

DSi Eclipse in the Cloud incorporates multiple features to streamline the document review process, including: coding forms with customizable document views, the ability to see all document relationships and batch document management.

### RAISING STANDARDS

*“For a long time, Summation was the ‘standard’ law firm review platform. We knew it was time to make a change; we needed more features, scalability and lower costs. DSi Eclipse in the Cloud meets those requirements and more. A new standard has been set.”*

The production module features an unprecedented number of options, such as: various criteria for production set selection, multiple choices of output types and load files, control over image format and color, ability to brand and tag files, and full production tracking.

### COMPLETE PROJECT MANAGEMENT SUPPORT

DSi’s experienced project management team provides training and oversees usage, making deployment and implementation easy. Leveraging best practices and expertise, we provide consulting on workflow, search terms and data management.

### WORLD-CLASS SECURITY

DSi’s rigorous protocols and compliance with ISO 17799 standards assure that our staff, technology and facilities are capable of protecting the most sensitive data. All client data and company critical systems are constantly backed up to our highly secure co-location facility, mitigating loss of time or data should our servers go offline for any reason.

### TOTAL CONTROL

You have full administrative control to load data, add cases, set access rights levels and edit settings. Plus, the flexible user interface allows you to set up and manage the application in the way that suits you best.
